[FLAC](#), [MP3](#), [WAV](#)

Digital music file

A digital music file refers to a digital representation of musical information. These files are used on computers and digital devices, allowing for various digital functions such as copying, transferring, and editing. File formats include [FLAC](#), [MP3](#), [WAV](#), and others, each representing a specific type of media. Users can view or modify these files using corresponding applications designed for each file format.
