The screenshot shows the main interface of the AudioFuse Control Center. At the top, there's a navigation bar with tabs for Preset (selected), Load, Save, and a Preset dropdown. To the right are Sample Rate (44100 Hz) and Clock Source (Internal) settings. The main area is divided into several sections: ANALOG INPUTS, ANALOG OUTPUTS, ADAT INPUTS, ADAT OUTPUTS, LOOPBACK, and REAR. Each section contains multiple input and output controls, such as knobs for volume and gain, and buttons for MUTE, DIM, and GND LIFT. The ANALOG INPUTS section has 16 channels labeled FRONT MIC 1-2, ANALOG IN 3-16. The ANALOG OUTPUTS section has 10 channels labeled MONITOR, PHONES, ANALOG OUT 1-10. The ADAT INPUTS and ADAT OUTPUTS sections have 16 channels each, labeled ADAT IN/OUT 1-16. The LOOPBACK section has 1 channel labeled LOOPBACK. The REAR section includes a volume control for the REAR outputs and a switch for 48V phantom power.
