Compander

가

FIRST HALF OF COMPANDING PROCESS
(2:1 COMPRESSOR IN TRANSMITTER)

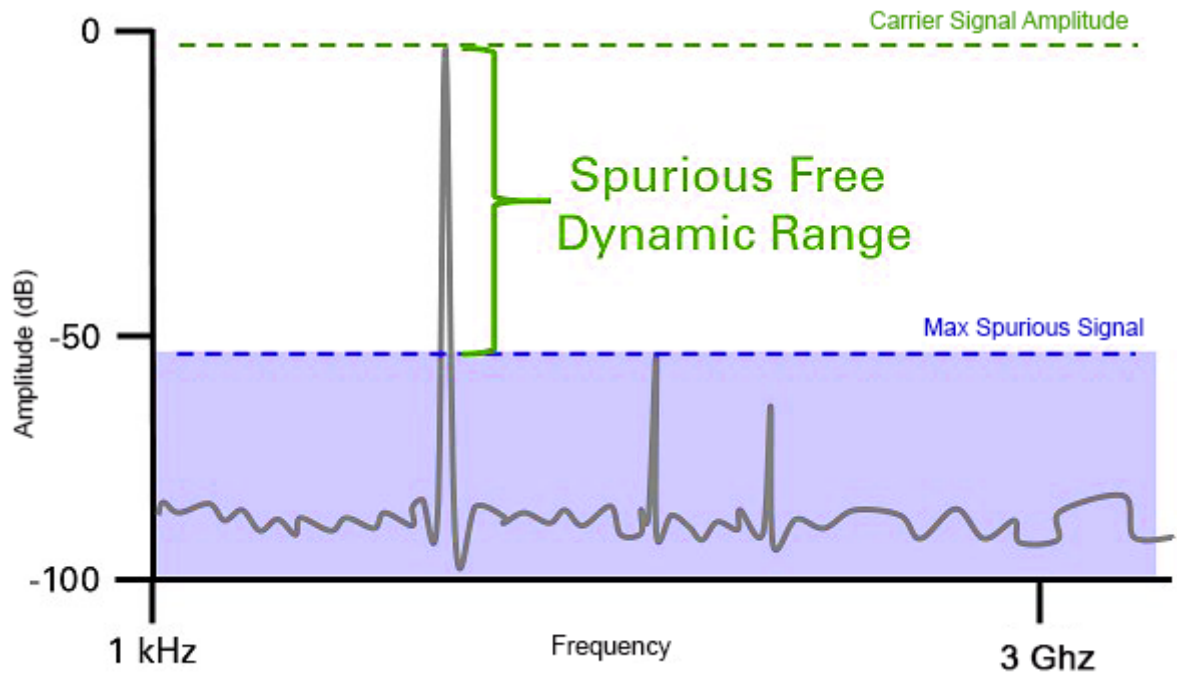

SECOND HALF OF COMPANDING PROCESS
(2:1 EXPANDER IN RECEIVER)

Compander

A signal processor that compresses the [dynamic range](#) of a source through a compressor before transmission, and at the receiving end, restores it to its original [dynamic range](#) through an expander for playback.

It is commonly used for purposes such as wireless transmission or recording and playback on low [dynamic range](#) media like tapes.
