Spectrum

A graph that represents the frequency components along the frequency axis, the level axis, and the time axis.

Depending on the representation method of the spectrum, there are graphs that show the frequency axis and the level axis as the X and Y axes, graphs that show the time axis and the frequency axis as the X and Y axes, and in some cases, a 3D graph that represents the frequency axis, level axis, and time axis as the X, Y, and Z axes.
